

## ROE Visual Returns to InfoComm 2022 with the Latest in AV

**Chatsworth, USA (May 2022)** – ROE Visual will be back once again at [InfoComm 2022](#) following two years of postponements. The much-anticipated event is scheduled for June 8-10<sup>th</sup>, in Las Vegas, NV. Following the full preparation for the upcoming show, the ROE Visual team will be presenting participants with advanced LED technology and newly-launched products on the floor of the Las Vegas Convention Center.

Each year, InfoComm offers the exciting opportunity for attendees to find innovative audiovisual solutions that enable integrated experiences in industries related to audio, digital signage, events and entertainment, and more. The ROE Visual team treats this large, influential event as a limitless platform to connect with attendees and showcase their newest technology.

With the increasing use of LED displays such as Black Pearl and Black Marble in studios and other locations worldwide, there is a growing demand for high-quality LED products for new functionalities. With this in mind, ROE Visual has continued to explore and test the limits of LED panels under various application fields. The US team is therefore showcasing the company's wide array of new products at InfoComm. New products will include the Opal series, a versatile platform for fixed installation, as well as Graphite and Carbon MKII panels intended for flexible application in the rental market.

Bringing the latest LED technology to the show, the ROE Visual team will demonstrate the remarkable features and uses of products at **Booth #N833**. Throughout the three-day exhibit, participants will have an in-depth look at the panels, learning how each performs while meeting the high expectations within the AV industry.

"We're excited and ready to meet with our partners, clients, and friends on the show floor of InfoComm 2022. This year, our team is coming with new applications in mind as we display new products and technology at our booth," states Frank Montero, Managing Director of ROE Visual US. "We welcome attendees of all backgrounds to join us and connect with our team in-depth about products, projects, or any questions they may have."

### Products on Display at InfoComm 2022:

**Opal LED Platform:** [Opal](#) is a new product series for AV Integration, aiming to provide designers and clients with a creative and versatile LED platform that accommodates indoor

and outdoor applications. Opal delivers a stunning visual display that feeds the desire to create, facilitating imaginative and extraordinary designs.

**Graphite:** The new product offers a durable yet lightweight LED solution that provides quick installation through its intuitive smart-lock system. [Graphite](#) is ideal for building large LED walls and ceilings fast and efficiently.

**Carbon MKII (Coming soon):** The launch of the Carbon MarkII series supplies a new lightweight LED solution for the outdoor rental market, offering a thin, yet solid structure. Carbon MKII is ideal for building large LED walls and ceilings for outdoor concerts or events.

**Black Pearl BP2V2:** The [BP2V2](#) offers the trusted performance of the Black Pearl BP2 in an updated version with high-speed components and true-to-content color representation. It results in an identical, perfect on-camera performance as the BP2, adding a vastly improved camera setup and handling. Its in-camera performance is unrivaled, ideal for film applications.

**Black Marble BM4:** The Red Dot award-winning [Black Marble LED floor panel](#) brings creativity to your feet. Available with a high-contrast glass, matte, or mirror finish, these floor panels are suited for a wide range of creative uses.

The team at ROE Visual is ready to meet you in person in Las Vegas! Connect with the team before, during, or after the show to discuss any inquiries or discover the latest in LED technology.
