

ROE Visual and Supreme Studio Team up for Thailand's Largest XR LED Wall

Aim for Superior Virtual Production in the Local Area

Shenzhen, China (April 2022) – Following the growing development of virtual production, Supreme Studio, the Thailand-based all-in-one video production studio, has constructed an unmatched LED wall with extended reality in mind. Supported by ROE Visual, the advanced technology for film studios can create realistic imagery in an immersive environment, heightening the quality of the production.

At the studio, every production need is met with best-in-class cameras and hyper-realistic LED panels to name just a few of the incredible features offered. Accordingly, for more complex projects, the studio always ensures the best experience and hands-on approach no matter the creative vision.

When setting up the XR LED walls, the studio selected ROE Visual on account of their industry-recognized quality. The main LED Wall is composed of Diamond DM2.6 panels at a 140-degree viewing angle, measuring 37x4 meters. The 6x3 meters ceiling consists of Carbon CB3 tiles. The Diamond and Carbon series are optimized for film and commercial shooting. Each screen is engineered to deliver vivid colors and brightness, contributing to the outstanding visuals and immersive experiences caught on camera.

“The Supreme Cave LED Wall has finally come into the public view after a long wait,” states Brynley Cadman, Supreme Studio Virtual Production Supervisor, “This is now the largest LED screen located in Thailand. The LED products provided by ROE Visual were impressive by every means. We look forward to the excellent footage and unique projects created by this amazing XR LED wall. Hopefully, we can create magic for our customers through the combination of creativity and advanced video production technology.”

“We truly appreciate the opportunity to collaborate with Supreme Studio. By having DM2.6 and CB3 panels installed for the Supreme Cave, we believe the XR LED Wall is ready to present excellent performances for many video productions projects in the future” comments Glory Gao, Deputy Sales Director of ROE Visual.

About Supreme Studio:
