

ROE Visual Prepares New Technology for a Dazzling LDI 2023

Chatsworth, CA (November 2023) – ROE Visual is headed to Las Vegas this December for the highly-anticipated Live Design Industry (LDI) show. Taking place December 3-5, 2023, the show features best-in-class solutions for touring, live events, and rental fields. This year, the ROE team is thrilled to promote the fine-pitch rental solution, Topaz, among other eye-catching products for the live events market.

The ROE booth for the 2023 show focuses on the touring side of the live events space, with a comprehensive stage setup reminiscent of the many stage designs involving ROE Visual panels over the years. Attendees will have the opportunity to get up close and personal with the panels, with a multitude of configurations at their fingertips.

LDI is the first North American show to exhibit the new, all-purpose live events LED panel, Topaz. The first of its kind for the company. ROE Visual's commitment to excellence is evident in the Topaz series, which combines trusted ROE Visual quality with a cost-effective solution. This new series comes in three versatile versions - Topaz flat, curve, and cube - allowing event organizers and AV rental companies to unleash their creativity like never before, while still achieving a superior return on investment.

In addition to Topaz's unveiling, the show will be the locale for other technology sneak peeks from the LED manufacturer as well as tour-tested favorites. Attendees can expect a large Topaz wall as centerstage, Graphite (GP 2.6), Carbon 5 MKII (CB5 MKII), Vanish (V8T), and ROE Strips. The LED video walls utilize [Brompton Technology processing](#) and are driven by [disguise](#) vx 2 and 2x4pro media servers. The stage portion of the design incorporates Black Marble (BM2) panels powered by [Megapixel processing](#).

Another first for the North American team, SMPTE2110 will be utilized for the flooring via Megapixel's HELIOS processor. And to achieve the rock show feel to the booth, the lighting is being provided by [Elation Professional](#). Alongside you will have the chance to sneak peek into the next level of creativity-enhancing tools - Apasras. Don't miss this opportunity to experience it yourself!

The annual live events conference is a staple in the touring and rental industry, with attendees from all over the globe convening to learn about the newest products and technology in the space.

The ROE Visual booth will be open during show floor hours of 11 am – 6 pm Sunday-Monday and 10 am – 3 pm Tuesday, with periodic musical performances during happy hour. Make sure to mark your calendars and save the **VIP code 10085** as you join us. Attendees are welcome to visit the booth **#877** to speak with the team and witness the new tech offerings firsthand. Stay tuned for more LDI news!
