

## Discover ROE Visual's Latest LED Solutions at Inter BEE

**Tokyo, Japan (November 2023)** - ROE Visual is delighted to announce its presence at the [Inter-BEE exhibition](#), the annual media event in Japan, which brings together professionals from various disciplines, including video, audio, broadcasting, and communication. ROE Visual will showcase some of its latest LED innovations, such as the Ruby Series and the Carbon CB5MKII RGB-W LED panel.

At Inter BEE, held from November 15<sup>th</sup> to 17<sup>th</sup>, ROE Visual will be represented on several stands of its partnering companies: [Hibino](#) (booth #3302), [Ark Ventures](#) (booth #3111), [Ikegami](#) (booth #4208), and [Restar](#) (booth #5212). Visitors will have the opportunity to get hands-on experience and discover ROE Visual's innovative LED-based solutions.

One of the highlighted products will be the **Black Pearl BP2V2**. This renowned product pioneered virtual production and helped create the world's largest virtual production studio, NantStudios.

Furthermore, the Black Marble LED floor will be showcased next to the [Ruby series](#), featuring 4-in-1 LED/ Flip Chip LED technology used in the Hibino VFX studio.

Additionally, ROE Visual is excited to showcase the [ROE Carbon 5 MKII](#) RGBW LED panel. This panel was developed in collaboration with Brompton. RGB-W LED panels offer greater flexibility in creating the desired color temperature while maintaining color accuracy. Combined with Brompton's LED processing innovation TrueLight, you can achieve unparalleled control and precision, balancing color and white light in your LED panel. By incorporating white LEDs into the traditional RGB spectrum, TrueTone allows for a broader range of color temperatures, superior color accuracy, and seamless transitions between warm and cool lighting. Creating true-to-life colors and natural lighting, setting a new standard in the realm of LED panel technology.

If you cannot attend Inter BEE, you are welcome to visit the ROE Visual showroom at the Japanese disguise offices. You can experience the remarkable virtual production technology and in-camera VFX within an LED volume. You can make a reservation [here](#).

We look forward to welcoming you to Inter BEE and our showroom to explore the exhilarating world of storytelling in a new way!
