

## Scene Change Relies on ROE Visual for the ARIA Awards

**Melbourne, Australia (4 December 2025)** – Scene Change Sydney selected ROE Visual's LED technology to support the 2025 ARIA Awards produced by Second Sunday, Australia's premier celebration of contemporary music. Scene Change Sydney used ROE Visual's flexible and versatile LED solutions to create a stunning stage setting for the Awards.

Scene Change utilized a combination of the Topaz and Graphite LED series to create an LED canvas of over 260 sqm. The visually striking backdrop for the award winners was complemented with Vanish 8S panels for the concave-shaped performance stage. All dynamic visuals were processed by six Brompton 4K Tessera SX40 LED processors and 18 Tessera XD data distribution units, ensuring uniform image quality and dependable on-camera results across mixed LED types, and handling varied lighting conditions without color shift or artefacts.

"For a live event of this scale, failure is not an option. We rely on ROE Visual products for their flexibility and reliability, and we trust them completely to deliver every time. Combined with the outstanding service from the ROE Visual team, this is why we continue to choose them as our partner for high-profile productions, says John Dinh, Director of Scene Change.

Scene Change is a full-service technical supplier based in Sydney, focusing on delivering high-quality, tailored event experiences with expert solutions. To support long-term growth, they became the first in Australia to introduce Topaz Curve, enhancing their capacity for seamless productions.

"We are delighted to support Scene Change on another major Australian live event. Our shared commitment to high-quality production continues to drive successful outcomes, and it's always rewarding to see our LED in a prominent role for high-end productions, such as the ARIA Awards," adds Grace Kuo, Chief Strategy Officer of ROE Visual.

**About Scene Change:**

Scene Change is a specialist technical production supplier for events across Australia, offering comprehensive solutions in various disciplines. Committed to delivering a holistic technical experience, Scene Change combines expertise in video, sound, and lighting to ensure every event is executed flawlessly. Their focus on innovation and quality service makes them a trusted partner for both corporate and creative events.
