

PRESS RELEASE

NEUMANN & MÜLLER EVENT TECHNOLOGY: INVESTMENTS FOR MAXIMUM CUSTOMER SATISFACTION

ROE Visual LED Impresses The Full-Service Provider From Germany

Leek, The Netherlands (29 January 2025) - ROE Visual proudly announces that Neumann & Müller Event Technology, one of Germany's leading production companies, has added ROE Visual LED panels to its inventory. This strategic investment reflects their commitment to delivering cutting-edge technology and exceptional client service.

N&M is a renowned production company based in Germany, specializing in delivering premium solutions for events, productions, and installations. With decades of experience and a reputation for excellence, N&M is a trusted partner for clients across the industry.

Renowned for their high-quality productions, N&M's decision to choose ROE Visual's Topaz 2.6 LED panels stems from a meticulous evaluation process. Designed for maximum versatility and performance, these panels set a new benchmark in the industry for efficiency and visual excellence.

"Are you sure?" was the reaction from some when N&M announced this innovative choice. The answer was a confident, "Yes, we are."

"Decisions for a new product are sometimes easy, but sometimes a more complex process. When it came time to decide on a new batch of indoor LED panels, the range of products and product combination options was pretty extensive. "We approached this decision with an open mind, focusing on what would deliver the best results for our customers," says Torsten Jacobs, General Manager for N&M.

"The ROE Visual Topaz 2.6 impressed us with its short setup time and outstanding visual performance; together with the Brompton LED processing, we ensure our clients receive state-of-the-art solutions."

The investment in the Topaz 2.6 panels highlights N&M's focus on efficiency and quality, empowering their clients with technology that meets the highest standards in the industry.

"We are honored that N&M has selected ROE Visual to enhance their already impressive portfolio of production services," comments Erik Baum, Business Development EU for ROE Visual. "Their decision to invest in the Topaz 2.6 underscores the trust and recognition that ROE Visual products enjoy among industry leaders."

With this investment, N&M continues to lead the way in providing top-tier production services, ensuring their clients benefit from innovative technology tailored to meet their specific needs. One of the first productions where the Topaz LED panels were out to the test was "SCOPE – the Business Festival" at the Confex Conference- and Exhibition Center in Cologne, which proved N&M's take on the investment right – the impressive setup was meticulous and visually stunning.
