

Smart Design - Enhanced Features

The Black Marble BM5 panels measure 600*600mm and have a 5.769 mm pixel pitch, these features make it possible to combine the BM5 LED floor with other LED modules, keeping the same resolution.

The Black Marble BM5 offers enhanced options, like an anti-moiré finish, for a better in-camera performance, a wide viewing angle and fully integrated interactivity.

BM5 with Anti-moiré finish

Powerful Interactivity

The BM5i panels have embedded optical sensors that detect when they have been activated by a foot, hand or really anything that you'd like to place on the interactive panels. High-resolution tracking on the BM5i floor, with 100 sensors per panel and multi-tracking on small surfaces make the interactivity a powerful tool.

The fast response time of 33 milliseconds and real-time data traffic to the content server make the experience unforgettable.

The BM5i panels use a Brightlogic processor, 2 receiver cards per panel control the interactivity and the display. Mix-and-match with standard BM5 panels is possible, using the same receiver cards. Data access is easy, making linking to Notch or your lighting controls a breeze.

25 sensors per module
