Jet

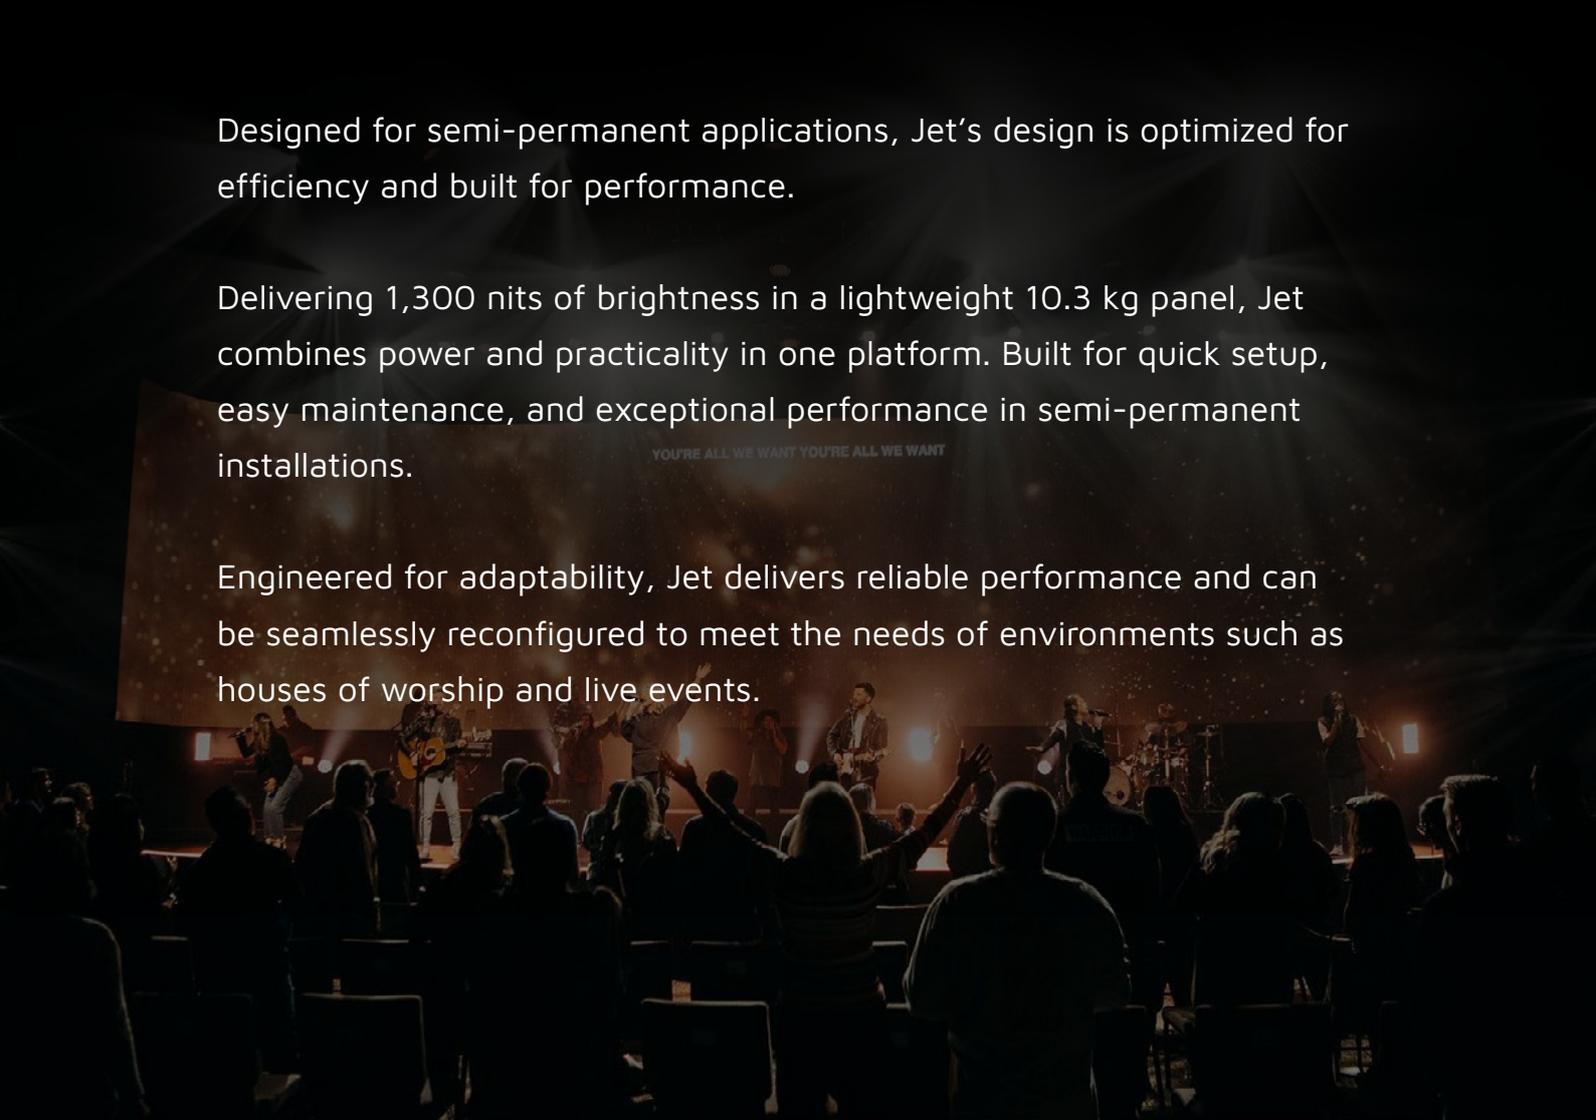

Superior LED Solution for Semi-permanent Indoor Applications

INDOOR FIXED INSTALL

Designed for semi-permanent applications, Jet's design is optimized for efficiency and built for performance.

Delivering 1,300 nits of brightness in a lightweight 10.3 kg panel, Jet combines power and practicality in one platform. Built for quick setup, easy maintenance, and exceptional performance in semi-permanent installations.

Engineered for adaptability, Jet delivers reliable performance and can be seamlessly reconfigured to meet the needs of environments such as houses of worship and live events.

Versatile Applications, Flexible Options

With exceptional flatness and an ultra-wide viewing angle, Jet delivers stunning visual performance for every viewpoint. Its innovative two-step locking system allows for quick, secure setup and greater flexibility in fixed installations such as houses of worship. At the same time, its modular design makes it easy to reconfigure for special occasions.

Unparalleled Visual Performance

With a high refresh rate of 7,680Hz and a brightness of 1,300 nits, Jet delivers smooth, seamless visuals that capture every detail with stunning clarity. The result is exceptional image quality and camera-ready performance.

Its high-contrast mask enhances depth, creating a more immersive viewing experience. Jet is the ideal choice for making your content stand out and captivate audiences.

High refresh rate

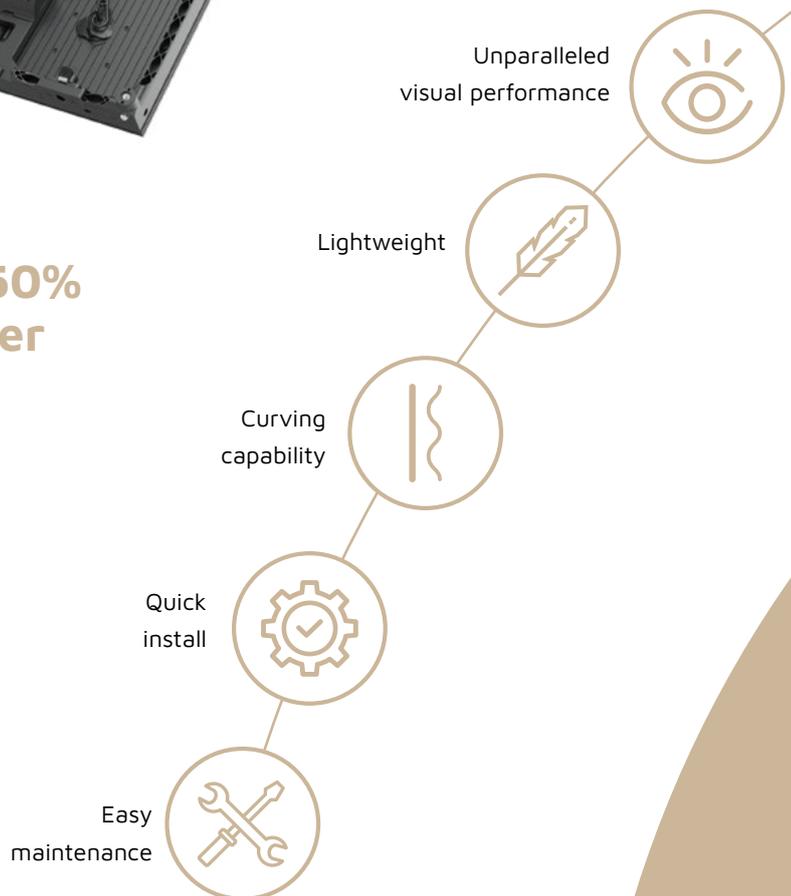

Low refresh rate

**30%~50%
lighter**

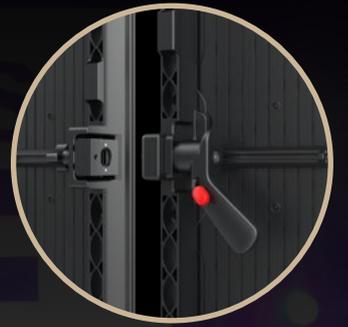

Lightweight and Durable

Each 500x1000 mm Jet panel weighs only 10.3 kg. Its thin yet robust frame design makes Jet 30-50% lighter than conventional LED panels without compromising strength, significantly reducing the effort required for installation and transport.

Installation in Seconds

Install Jet in just two steps — connect and lock. Jet’s revolutionary vertical locking system features a magnet-assisted design that allows each panel to be secured effortlessly. Once aligned, a single push of the handle locks it firmly into place. Combined with user-friendly horizontal locks, the system enables large-scale assemblies to be completed in seconds.

Curving Capabilities

Jet supports customizable curving options ranging from **5° convex to 5° concave** (+5°, 0°, -5° blocks). Specific angles can also be made to meet unique project requirements.

Easy Maintenance

Jet's modules are interchangeable, supporting both front and rear maintenance for maximum flexibility. The PSU box installs and removes without tools and can be securely fastened by hand for effortless servicing. Optimized thermal design enhances heat dissipation, ensuring stable, reliable performance.

Jet 1.9 GOB

Jet 1.9 GOB offers stronger protection with a smaller pixel pitch, providing reliable impact resistance as well as anti-dust and waterproof features, which effectively reduce the risk of damage to the LEDs. With improved light uniformity, the visual performance is significantly enhanced.
